Subject: KIWI: Media Inquiries for West, Texas [REDACTED] -- 10 a.m. Report

6/20/13 – 10 a.m. Report

OPEN INQUIRIES

West, Texas

1. Houston Chronicle

REPORTER: Ingrid Lobet, Ingrid.Lobet@chron.com, 713.362.7208

REPORTER REQUEST

I am working on a story about a type of cleaning that happens in the petrochemical industry and need to speak with an expert in hazardous waste. Things I will need to talk to this person about:

- 1) documents and records required pertaining to hazardous waste that is generated at tank wash facilities
- 2) documents and records required when such waste is trucked to a haz waste disposal facility
- 3) documents and records required of the receiving hazardous waste facility

Can you identify for me who at EPA has this expertise and let me know how soon I might be able to speak with him or her?

STATUS: [REDACTED]

2. Reuters

REPORTER: Ryan McNeill, ryan.mcneill@thomsonreuters.com, 646.223.7446

REPORTER REQUEST

Also, can any of you help me obtain copies of RMP data provided to the Center for Effective Government?

More specifics from the reporter:

It may be under OMB Watch, the former name.

As I understand (I may be slightly off), they filed a FOIA several years ago. EPA did not respond. The group sued in federal court and EPA provided the data before it went to trial.

Long story short: All I'd like to do is get a copy of the most up-to-date RMP data. Clearly, it's public record --- I'm just hoping we can do this with the least amount of headaches for EPA and us.

STATUS: [REDACTED]

INQUIRY: Can any of you help me obtain copies of RMP data provided to the Center for Effective Government?

[REDACTED]

INQUIRY: So after examining TIERII data from 30 states, speaking with chemical company executives, state emergency management officials and chemical safety experts at the CSB, private groups and at universities we have determined that the TIER II hazardous chemical storage data is often unreliable because there is almost no effort by the EPA or state agencies to make sure the data is accurate. Instead the job is left to the local fire departments and county officials who often don't even know what chemicals should be listed on a TIER II. I understand that this might be a budget issue for the EPA, but could we discuss this?

Enesta,

I know you are working with my colleague, Michael Pell, on another matter. But I need to talk with someone on background today about your raw enforcement data (ICIS-FE&C) to make sure I am using it correctly and interpreting it correctly. For example, I've found what I believe are the settlement of 127 enforcement actions by the EPA involving EPCRA Section 312 violations since Jan. 1, 2012. I'd like to know additional things, such as how to ensure that I'm pulling cases in which a settlement was reached and a fine was paid for those violations. Also, whether it is possible to extract the fines paid specifically for the Section 312 violations and a few other things. I have to move quickly on this and I'm sure you guys would like to ensure I'm correctly interpreting the data. Please let me know. I can make myself available to meet your schedule.

Thanks in advance,

Ryan....

1. Houston Chronicle

REPORTER: Ingrid Lobet, Ingrid.Lobet@chron.com, 713.362.7208

REPORTER REQUEST

I am working on a story about a type of cleaning that happens in the petrochemical industry and need to speak with an expert in hazardous waste. Things I will need to talk to this person about:

- 1) documents and records required pertaining to hazardous waste that is generated at tank wash facilities
- 2) documents and records required when such waste is trucked to a haz waste disposal facility
- 3) documents and records required of the receiving hazardous waste facility

Can you identify for me who at EPA has this expertise and let me know how soon I might be able to speak with him or her?

Per Alisha, Enesta Jones sent the following response to the reporter:

The main difference between a "tank" and a "container" is that a tank is a permanent structure while a container is portable.

The documents below are training modules for RCRA regulations, and are pretty straightforward. They can provide a general understanding of RCRA, but they are not intended to serve as comprehensive sources of regulatory information.

This one is for containers and is 13 pages. The empty container regulations discussion starts on page 7.

<http://www.epa.gov/osw/inforesources/pubs/training/cont05.pdf>

This one is for tanks and is 21 pages.

<http://www.epa.gov/osw/inforesources/pubs/training/tanks05.pdf>

This one is for hazardous waste generators and is 23 pages

<http://www.epa.gov/osw/inforesources/pubs/training/gen05.pdf>

This one is for hazardous waste transporters and is 13 pages

<http://www.epa.gov/osw/inforesources/pubs/training/trans.pdf>

This one is for a hazardous waste treatment, storage and disposal facilities and is 20 pages.

1. Sen. Barbara Boxer, who chairs the Senate's Environment and Public Works Committee, has asked for a hearing on Thurs., June 27 about the West Fertilizer explosion. OCIR said they have not yet received an invitation, but OSWER is preparing for it.

3. Reuters reporter Ryan McNeill is asking for a backgrounder today on EPCRA violations and settlements since 2012. His colleague, Michael Pell, is requesting an on-the-record to discuss the flaws and reliability of the TIER II reporting system, for follow-up pieces on the Texas and Louisiana explosions. OMR is working with OECA, OSWER and OPS on how to proceed with these requests.

Enesta,

I know you are working with my colleague, Michael Pell, on another matter. But I need to talk with someone on background today about your raw enforcement data (ICIS-FE&C) to make sure I am using it correctly and interpreting it correctly. For example, I've found what I believe are the settlement of 127 enforcement actions by the EPA involving EPCRA Section 312 violations since Jan. 1, 2012. I'd like to know additional things, such as how to ensure that I'm pulling cases in which a settlement was reached and a fine was paid for those violations. Also, whether it is possible to extract the fines paid specifically for the Section 312 violations and a few other things. I have to move quickly on this and I'm sure you guys would like to ensure I'm correctly interpreting the data. Please let me know. I can make myself available to meet your schedule.

Thanks in advance,

Ryan....

Subject: RE: ACTION: Reuters and ECHO

INQUIRY: Can any of you help me obtain copies of RMP data provided to the Center for Effective Government?

RESPONSE: In order to receive information from RMP database, you must submit a FOIA. Here is the website address for submitting the FOIA request:

<http://www.epa.gov/foia/submission.html>

INQUIRY: So after examining TIERII data from 30 states, speaking with chemical company executives, state emergency management officials and chemical safety experts at the CSB, private groups and at universities we have determined that the TIER II hazardous chemical storage data is often unreliable because there is almost no effort by the EPA or state agencies to make sure the data is accurate. Instead the job is left to the local fire departments and county officials who often don't even know what chemicals should be listed on a TIER II. I understand that this might be a budget issue for the EPA, but could we discuss this?

RESPONSE: The EPCRA statute stipulates that the Tier II information goes to the SERCs, LEPCs, and fire department, not to EPA. It is therefore up to those entities to review the information and ensure it is correct.

REPORTER: Michael Pell, michael.pell@thomsonreuters.com, 646.223.6997

REPORTER REQUEST

I don't need background comments. I need someone to discuss the flaws of the TIER II reporting system with me on the record. For example, the states and local officials say they expect EPA enforces TIER II reporting requirements. If no one is ensuring the quality of the data, how reliable of a tool are the TIER II reports?

STATUS: [REDACTED]

Per Alisha, Enesta Jones sent the following responses to the reporter (Ryan McNeill) on 6/20:

INQUIRY: Can any of you help me obtain copies of RMP data provided to the Center for Effective Government?

RESPONSE: In order to receive information from RMP database, you must submit a FOIA.

Here is the website address for submitting the FOIA request: <http://www.epa.gov/foia/submission.html>

INQUIRY: So after examining TIERII data from 30 states, speaking with chemical company executives, state emergency management officials and chemical safety experts at the CSB, private groups and at universities we have determined that the TIER II hazardous chemical storage data is often unreliable because there is almost no effort by the EPA or state agencies to make sure the data is accurate. CLOSED INQUIRY

West, Texas

1. Houston Chronicle

REPORTER: Ingrid Lobet, Ingrid.Lobet@chron.com, 713.362.7208

REPORTER REQUEST

I am working on a story about a type of cleaning that happens in the petrochemical industry and need to speak with an expert in hazardous waste. Things I will need to talk to this person about:

- 1) documents and records required pertaining to hazardous waste that is generated at tank wash facilities
- 2) documents and records required when such waste is trucked to a haz waste disposal facility
- 3) documents and records required of the receiving hazardous waste facility

Can you identify for me who at EPA has this expertise and let me know how soon I might be able to speak with him or her?

Per Alisha, Enesta Jones sent the following response to the reporter:

The main difference between a “tank” and a “container” is that a tank is a permanent structure while a container is portable.

The documents below are training modules for RCRA regulations, and are pretty straightforward. They can provide a general understanding of RCRA, but they are not intended to serve as comprehensive sources of regulatory information.

This one is for containers and is 13 pages. The empty container regulations discussion starts on page 7.

<http://www.epa.gov/osw/inforesources/pubs/training/cont05.pdf>

This one is for tanks and is 21 pages.

<http://www.epa.gov/osw/inforesources/pubs/training/tanks05.pdf>

This one is for hazardous waste generators and is 23 pages

<http://www.epa.gov/osw/inforesources/pubs/training/gen05.pdf>

This one is for hazardous waste transporters and is 13 pages

<http://www.epa.gov/osw/inforesources/pubs/training/trans.pdf>

This one is for a hazardous waste treatment, storage and disposal facilities and is 20 pages.

<http://www.epa.gov/osw/inforesources/pubs/training/tsdf05.pdf>
